A fold-under extension is an easy way to increase the reach of your MarQuipt davit or crane. Fold-under extensions can support higher loads than a slip-on extensions and fold beneath the boom, up and out of the way when not required.

Commonly used to lift small personal water craft or scooters over an existing tender, boom extensions are also popular for reaching engine room hatches and for lowering spare pops over the stern.

- Extensions available for all non-telescoping Tender-Lift and Low Profile series davits and cranes.
- Stows conveniently under boom when not in use.
- 600 LBS (275 KG) lift capacity fold-under extension for Tender-Lift and Low Profile shown below.
- Custom length and weight capacity extensions are available.
